INTRODUCTION

5.10 YOE, Cloud-Native Backend Developer Having Expertise in **GoLang, Java, Docker, Kubernetes, Kafka, HDFS, Microservices and Distributed Systems** to Build Scalable Solutions.

EXPERIENCE

CloudBees Inc, Senior Software Engineer

April 2025 – June 2026

- **Developed Customer Facing Feature To Show Action Names Calling Steps:** Enhanced debugging UX using **GoLang** with recursive tree algorithm for nested **Tekton** workflows.
- **Resolved Kubernetes etcd Constraint Using Tekton Architecture Analysis:** Discovered **Tekton's** 3 MB etcd limit at 160+ steps, architected **GoLang** chunk-based solution for unlimited workflows.
- **Architected Centralized OIDC Authentication Using Protocol Buffers:** Consolidated claim generation across **GoLang** microservices with 4-phase migration using **gRPC** for **Tekton** pipelines.
- **Automated Container Security Pipeline Using Kaniko, Trivy, Snyk, GitHub Actions:** Established weekly automated base image rebuilds with ECR integration, resolved 11 high-priority CVE tickets.
- **Fixed Workflow Timeout Logic in Tekton Job Configuration:** Resolved approval workflows ignoring timeouts causing 48-hour waits using **GoLang** in **Tekton** approval states.
- **Optimized Search Index Synchronization Using Distributed Systems:** Fixed run status propagation using **GoLang** microservices and **gRPC**, reducing index errors by 95%+.
- **Refactored RBAC Authorization Using Java and Keycloak:** Isolated explicit Owner role assignments from implicit ownership, implemented team-specific validation.
- **Led AI Hackathon Building RAG Chatbot Using Claude AI:** Developed production-adopted chatbot, optimized Datadog achieving 80.2% log reduction, resolved 40+ CVEs.

Fujitsu Research of India Private Limited, Senior Software Engineer

June 2023 – March 2025

- **Developed Kafka Consumer Microservices Using Spring Boot and MongoDB:** Built Fresh Alarm and Resync Alarm services for VXM NMS System with Elasticsearch Database.
- **Fully Automated Collector Manager API Using CICD Pipeline:** Runs all test cases on PR using Shell Scripting and Groovy before review.
- **Implemented POCs for Kafka Consumer Group Dead Issue:** Used CronJob, Proxy Kafka REST APIs, JVM Based Threaded approaches.
- **Developed CronJob To Maintain HDFS HA State:** Manages NameNode Active/Standby with ZooKeeper and Kafka monitoring.
- **Designed GoLang Based Simulator for Network Elements:** Implemented simulator for NetConf and IFinity Network Elements for VXM/VNC NMS Systems as part of Fujitsu's Flagship Simulator Team.

Flexera Software, Software Engineer

Feb 2023 – May 2023

- **Cloud Cost Optimization APIs:** Built APIs using Golang, MongoDB, GRPC, AWS, Azure, GCP, Kinesis to reduce cloud costs.

Nokia Networks, Software Engineer, Research and Development

July 2020 - Feb 2023

- **Developed Stateful Golang Microservice:** Sends 3GPP files to Kafka/NooBaa S3 Storage based on configuration for NOM NMS System.
- **Resolved Out of Memory Using Java:** Increased SNMP PM XML capacity from 6K to 15K Counters (2.5x) for NetAct NMS System.
- **Created GoLang REST Server Using Gorilla Mux:** Exposes POST/GET endpoints for Network Element Data/Info for NOM system.
- **Recognized in Nokia's Innovation Week 2021:** Presented innovative idea for Public safety domain in Bangalore RD.

TECHNICAL EXPERTISE

Tech Stack: GoLang, Java, Python, Shell Scripting, Groovy, Microservices, REST APIs, gRPC, Protocol Buffers, Kubernetes, Docker, AWS, Azure, GCP, Tekton, etcd, Helm, GitHub Actions, Trivy, Snyk, ECR, Datadog, Kafka, S3, MongoDB, Elasticsearch, HDFS, OIDC, OAuth, Keycloak, SSO, CVE Management, RAG Architecture, Claude AI, Ollama

EDUCATION

NIT Jamshedpur, Master of Computer Applications (MCA), GPA: 7.60

2017 - 2020

IEM Kolkata, Bachelor of Computer Applications (BCA), GPA: 8.74

2014 - 2017
